

KRISTAL LIQUID MASTIC

CHARACTERISTICS

GLOBALIT is a bi-component Italian mastic for marble and granite with brilliance and sturdiness similar to stone.

This product is ideal both for carrying out gluing operations on slabs of marble, granite and natural stones as well as for filling holes from porosity and imperfections on surfaces. It's supplied with the hardener paste in jar or tube. Clear, low viscosity fluid mastic. Ideal for gluing and for horizontal repairs of marble, onyx and stone. The hardened product is already shiny. The low temperature reactivity is excellent. The adhesion on the materials and the mechanical resistance represent the outstanding qualities of this product.

APPLICATION

Be sure that surface that you must treat is dry, clean and free of dust. Take out the necessary mastic quantity from the tin / can / drum and the liquid hardener.

Mix energetically and use the obtained product for your purposes. Do not put the unused final mixture again into the tin. If it is necessary to correct the product colour, use specific colored pasts or metal oxides. Add the colour before adding the hardener until you reach the desired hue and finally you can add the hardener. Any excess of colour can affect the final characteristics of the mastic. Take care.

Keep the tins well closed after usage. Keep the mastic and the hardener far away from light sources and foremost far away from sun rays.

APPLICATION MATERIAL

Granite

Marble

Natural stone

APPLICATION TOOLS

spatula
