

ADHESIVE SYSTEM

CHARACTERISTICS

MIXER BOND is a high adhesion system for gluing ceramic materials, marble and stones, both indoors and outdoors. The product is packaged in 215 ml cartridges, which includes resin and hardener already pre-dosed (2 : 1). With the aid of a special static mixer spout and appropriate gun, it allows the correct dosage of the components without any effort. It is characterized by excellent adhesion in a very short time, 30 - 40 min, allowing the cutting and polishing of the glued pieces. Once hardened, the product has a smooth, shiny and well polishable surface.

APPLICATION

Apply the product on a clean, dry and dust-free surface. In the case of shiny and / or smooth surfaces, it is recommended to sand the substrate before gluing. Fasten the mixer to the cartridge with the special nozzle. Before proceeding with the gluing extrude about 5-10 gr of product (about 30 cm of curb); this operation is to be repeated at each mixer change. After use, clean the tip with a piece of paper and close the cartridge. Discard the used mixer. Use only guns suitable for the 2: 1 cartridge. The product does not harden below + 1 ° C. Ready-to-use system, without the possibility of mixing errors. Shelf life: 18 months from production date if well stocked.

APPLICATION MATERIAL

Ceramic

Marble

Natural stone

WHERE TO APPLY

outside

inside

Gun that allows the correct dosage of the components.
