

VINYLESTER MASTIC

CHARACTERISTICS

SILVER BOND brand new mastic based on epoxy-acrylate resins, has been studied and developed to glue and laminate marbles, natural stones (quartz, travertine etc.), synthetic stones, traditional ceramics and technical ceramics (for example: detkton, lapitek). The main features that differentiate it from other widely used mastics are: wide range of use, excellent adhesion on surfaces, quick drying and excellent resistance to yellowing. One of its peculiarities is the colour change when adding the hardener and then returning to the original colour after catalysis. Ideal for indoor use.

FEATURES

Epoxy-acrylate resin

COLOUR

transparent white

TYPE

solid

CONTAINER

ADR

1L e

APPLICATION

Once applied the mastic with a spatula you will notice a very fast adhesion, only 15-25 minutes even with low temperatures.

At the end of the treatment, the surface, where the mastic has been applied, will be shiny.

APPLICATION MATERIAL

Granite

Ceramic

Natural stone

APPLICATION TOOLS

spatula

WHERE TO APPLY ?

indoor
