

## REBAR BENDING MACHINE

### DESCRIPTION

The GOLDEN BULL - REBAR BENDING MACHINES for concrete reinforcing steel rods are the result of years of experience. The machines are divided in two lines: the standard one and the evolution one. The EVO line is the result of the latest building technologies applied to the experience achieved over the years. These new models are standardly produced with a wide turning plate, that permits to obtain larger curving radii compared to the Standard version, and with long saddles, that allow to perform the "double bending".

Different models available: Standard line: P36 / P42 / P52 / P55

Different models available: Evo line: P34 / P38 / P44/ P54 / P56 / P74
